Nexus Infrastructure Supplies ERP Financial Reports Development Services for MWAA

Nexus Infrastructure LLC, an infrastructure advisory firm based in Washington DC, was retained by the Metropolitan Washington Airports Authority (MWAA), operator of the Reagan National and Dulles International airports, to develop critical financial reports for the implementation of a multi-million-dollar Enterprise Resource Planning (ERP) solution. The system will unite the Authority's administration, financial, human resources, and maintenance database systems to enhance operational and management efficiency and effectiveness across the entire 1,500-person organization.

Nexus is supplying these supplemental consulting support services for MWAA's Offices of Finance and Financial and Strategy Analysis as part of the Authority's multi-year, enterprise-wide system deployment. In this capacity, Nexus is developing dozens of complex monthly financial reports to be produced within the new financial system, identifying reporting requirements and generating technical report specifications. To accomplish these tasks, Nexus is working in close concert with staff and personnel of the Authority and the larger project team, led by partner firms IBM and Booz Allen Hamilton.

Nexus was retained for this work, in part, for the previous experience of its principals in assisting with the comprehensive business process reengineering project for all major departments of the Authority in advance of ERP implementation in 2007-2008. Nexus principals led the reengineering of the billing and accounts receivable and asset management areas, completing a full-scale reengineering of all business processes and developing an extensive inventory of ERP reporting needs. The results of this work were integrated into the scope of the system requirements, providing the foundation for the functional solution ultimately developed.

Nexus provides innovative financial and operations consulting services such as financial planning, public-private partnership evaluation and structuring, project prioritization, feasibility studies, modeling and asset valuation, and capital programming. Nexus serves owners and operators of roadways, airports, transit, rail, other transportation and utility assets. The firm enjoys an expansive reach through a broad geographic distribution of advisors and contacts that extends across the country. Nexus can be reached at 202.274.1830.
